- Brancher le pocket Wifi en filaire sur un pc
- ou se connecter en Wifi via les infos sur l'étiquette au verso

Etape 6 Se connecter (**admin** par défaut)

Etape 7 Cliquez sur **Enable And Continue**

CONFIGURATION

Etape 8

Vous pouvez personnaliser le nom de votre routeur (SSID) ainsi que le mot de passe

The screenshot shows a web browser window with the URL `192.168.8.1/html/guide.html?version=22.001.29.01.03undefined`. The page header includes the HUAWEI logo and a language dropdown menu. The main content area is titled "Set Wi-Fi name and Password" and contains two input fields: "Wi-Fi name (SSID)" with the value "TonRouteur" and "Wi-Fi password" with the value "@TonMotdePasse". A green "Strong" indicator is visible next to the password field. A "Next" button is located at the bottom of the form.

Etape 9

Cochez la case **Same as Wi-Fi password** si vous avez changé le mot de passe puis **Finish**.

The screenshot shows the "Set Router Login Password" page. It features a toggle switch for "Same as Wi-Fi password" which is turned on. Below it is a "New password" field containing "@TonMotdePasse". A large blue arrow points to the right. At the bottom, there are "Finish" and "Back" buttons. To the right of the form, a message reads: "Saving your settings... (Wi-Fi has been restarted. Please reconnect your devices)".

CONFIGURATION

Etape 10 Cliquez sur **Network Settings**

The screenshot shows the Huawei web interface. At the top, there is a navigation bar with the Huawei logo and the text "HUAWEI". Below the navigation bar, there is a menu with the following items: Home, Network Settings, Wi-Fi Settings, Devices, Tools, and Advanced. The "Network Settings" item is highlighted. Below the menu, there is a status bar with the following information: 4G VODAFONE, Internet disconnected, My device, 2.4GHz, and 1 devices. Below the status bar, there is a button labeled "Disable Mobile Data".
